12. 3. How to Create an Issue	34
12.1. Step 1:	34
12.2. Step 2:	34
12.3. Step 3:	35

Chapter 1. PART 0. Introduction

The overall service performance of the WMO Information System 2.0 (WIS2) relies on the operational quality of all Global Services. The WIS2 monitoring procedure was launched in April 2025, succeeding the WIS1 Watch, which had been active from 2017 through 2024. This Guide was first developed in 2020 to standardize the procedures for GISC Watch operation in accordance with the Resolution 57 (Cg-18) and the feedbacks from GISC based on their experience of the WISC Watch practice. This 2025 edition aims at adapting the procedures to WIS2. It is intended to assist GISCs in fulfilling their GISC Watch responsibilities.

This guide presents the procedures to be used:

1. Procedures for Take over
2. Procedures for Monitoring
3. Procedures for Issue Management
4. Procedures for Hand over
5. Procedure for Escalation

Chapter 2. PART I. Procedures for Take over

Procedure to use when a GISC starts its GISC watch period:

- (a). Take over the GISC Watch duty according to the agreed roster.

The GISC Watch roster is available here: https://community.wmo.int/en/activity-areas/wis/gisc_watch

- (b). Handover acknowledgement

- Accept the hand-over-report from previous GISC
- Send an acknowledgement to confirm receipt.

Note: To ensure the continuity of GISC Watch, the incoming GISC must begin monitoring duties at the start of its roster period even if the handover email/report has not yet been received.

Sample takeover email:

From: GISC Beijing
To: GISC Toulouse
Cc: gisc-ops@groups.wmo.int,wis@wmo.int
Subject: GISC WATCH Takeover (16-30 April) confirmed: GISC Watch Report 01-15 April 2025

Dear GISC Toulouse,
Thank you for your efforts and the handover report.
GISC Beijing will take over the duty from April 16th to 30th 2025.
Best regards,
GISC Beijing

- (c). Review open tickets

At the beginning of its monitoring period, review any open tickets from the previous period.

Chapter 3. PART II. Procedures for Monitor

Procedure to use by the GISC on duty during the monitoring period.

Basic Principles:

1. The GISC Watch's goal is focusing on the Global Services level (Global Broker, Global Cache, Global Discovery Catalogue, Global Monitoring).
2. Issues regarding data coming from WIS2Nodes are managed by GISCs according to their AoR (Area of Responsibility). The GISC Watch can pinpoint issues to the GISCs, but this is not mandatory.
3. A large part of the monitoring activity is already performed on the Global Monitoring level, with JIRA tickets to be automatically initiated.

The following table shall be filled in, by checking Global Monitoring metrics (see detailed information how to get the figures after the table):

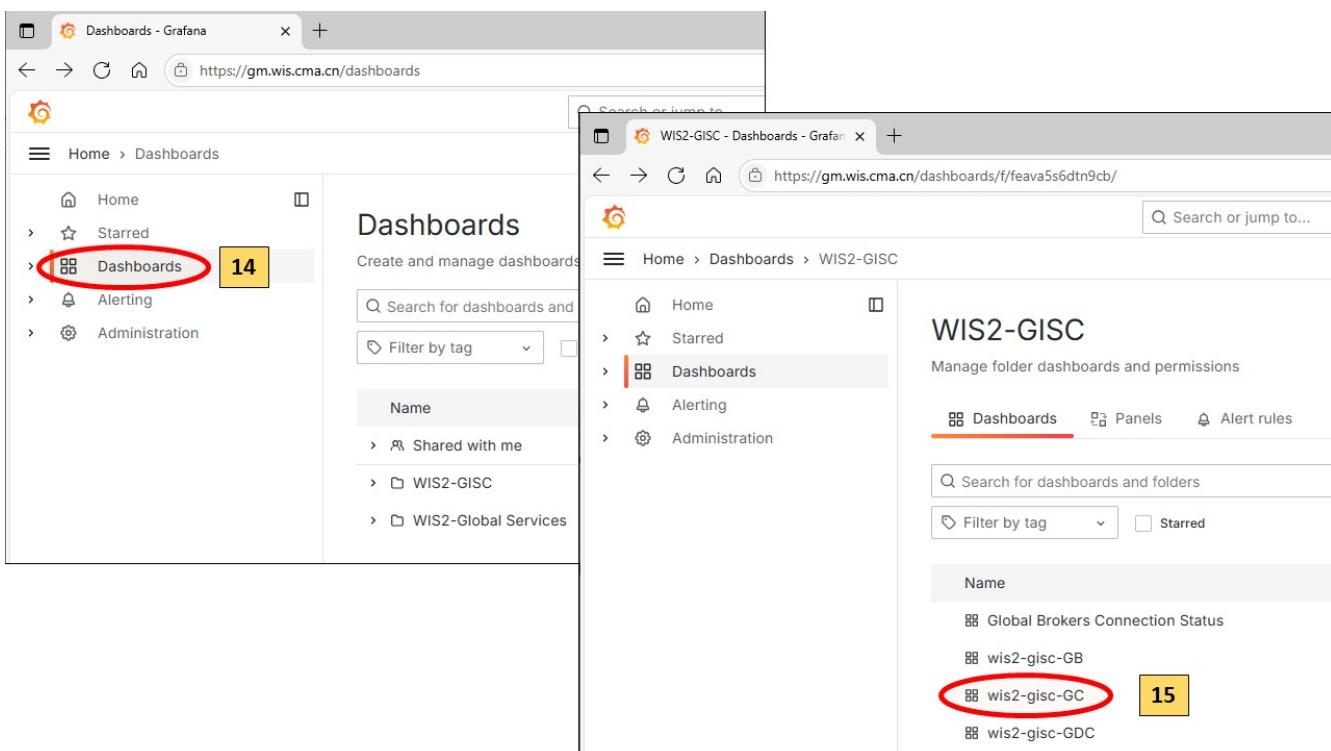

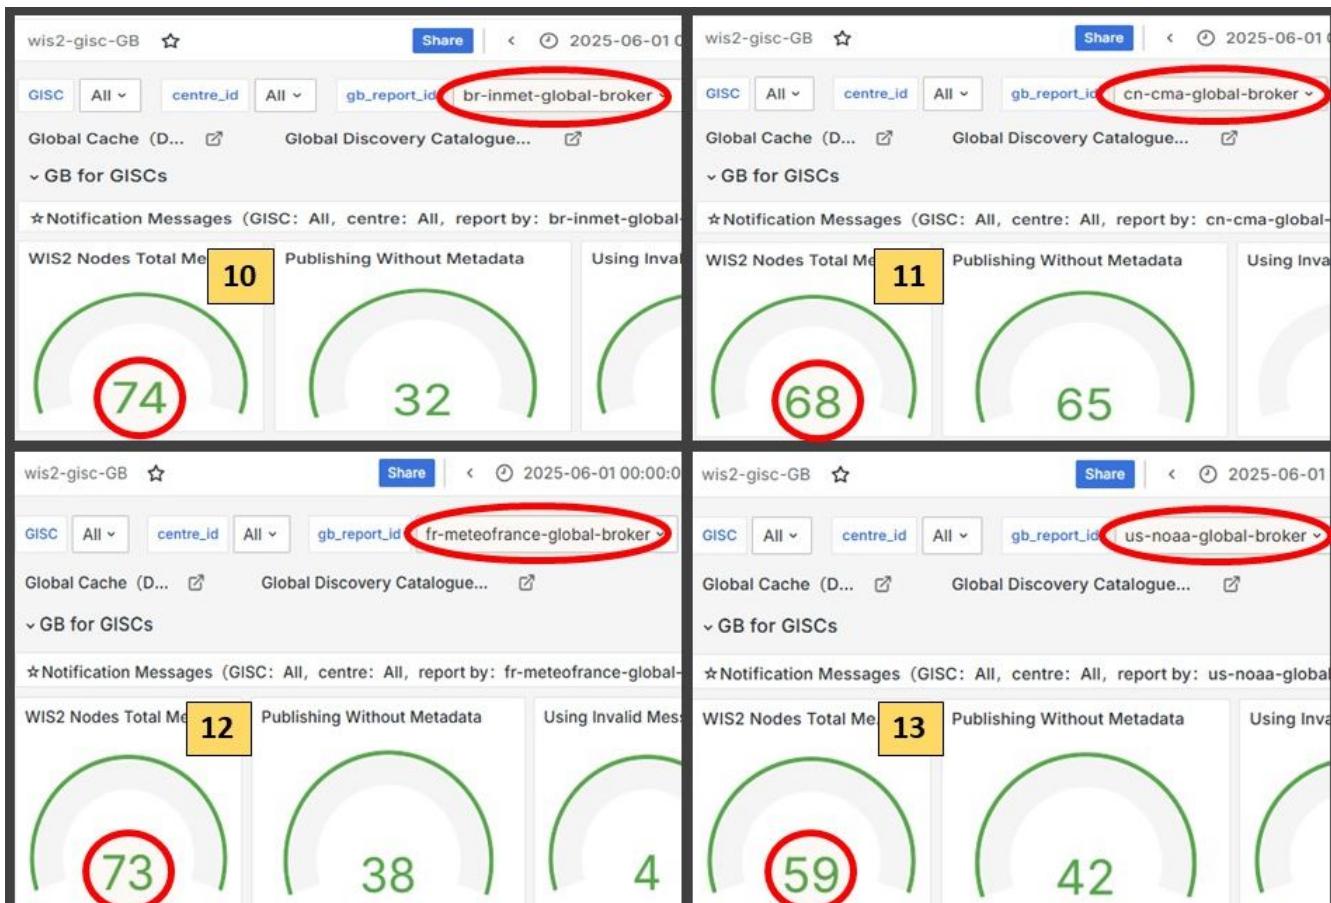

For GM-China Dashboard:

The figure consists of five screenshots illustrating the navigation steps to select a dashboard in Grafana:

- Screenshot 1:** Shows the Grafana login screen at <https://gm.wis.cma.cn>. A yellow box labeled '1' highlights the 'Welcome to Grafana' header. The login form has 'wis2-user' in the email/username field and a password entered. A blue 'Log in' button is visible.
- Screenshot 2:** Shows the Grafana home page after logging in. A red circle highlights the 'Home' link in the top left. A yellow box labeled '2' is placed over the 'Home' link.
- Screenshot 3:** Shows the 'Home' menu in the top right. A red circle highlights the 'Dashboards' link. A yellow box labeled '3' is placed over the 'Dashboards' link.
- Screenshot 4:** Shows the 'Dashboards' page. A red circle highlights the 'Shared with me' section under 'Name'. A yellow box labeled '4' is placed over this section.
- Screenshot 5:** Shows the 'Dashboards' page with the 'wis2-gisc-GB' dashboard highlighted by a red circle. A yellow box labeled '5' is placed over this highlighted item.

This screenshot shows a Grafana dashboard titled "wis2-gisc-GB - WIS2-GISC - Dashboards". The top right corner features a dropdown menu for selecting a time range, with "Last 6 hours GMT" highlighted by a yellow box and a blue arrow pointing to it. A red circle highlights the date "1" in the calendar view. A red oval highlights the "Apply time range" button. Below the time range selector is a list of brokers: "br-inmet-global-broker", "cn-cma-global-broker", "fr-meteofrance-global-broker", and "us-noaa-global-broker". The main area contains several gauge charts: "WIS2 Nodes Total Messages" (74), "Publishing Wi" (66), "WIS2 Nodes Total Messages" (73), "Publishing Without Metadata" (38), "Using Invalid Message For..." (4), "Using Invalid Mess..." (2), and "Silent (no msg over..." (1).

This screenshot shows the same Grafana dashboard after applying a custom time range. The time range selector now displays "2025-06-01 00:00:00 to 2025-06-01 23:59:59 GMT". The broker list has been updated to include "Enter variable value" at the top, with the previous entries: "br-inmet-global-broker", "cn-cma-global-broker", "fr-meteofrance-global-broker", and "us-noaa-global-broker". The gauge charts remain the same as in the first screenshot.

How to fetch data from the dashboards:

3.1. Global brokers data

3.2. Global caches data

A screenshot of a user profile interface. At the top right, there are icons for help, refresh, and user profile. Below them is a blue 'Share' button and a time filter set to 'Last 24 hours GMT'. A dropdown menu is open, showing the username 'gisc_user' highlighted in yellow. The menu options include 'Profile', 'Notification history', and 'Change password'.

Log in as gisc_user

A screenshot of the Grafana Dashboards interface. On the left, a sidebar shows navigation links: Home, Starred, Dashboards (which is selected and highlighted in yellow), Playlists, Snapshots, Library panels, Public dashboards, Alerting, and Administration. The main area is titled 'Dashboards' and contains the sub-instruction 'Create and manage dashboards to visualize your data'. It features a search bar, a 'Filter by tag' dropdown, and a 'Starred' checkbox. Below these are sections for 'Name' and 'Shared with me'. Under 'Shared with me', there is a section for 'WIS2-GISC' which lists three dashboards: 'wis2-gisc-GB', 'wis2-gisc-GC' (highlighted in yellow), and 'wis2-gisc-GDC'.

Click on Dashboards, then wis2-gisc-GC

The screenshot shows a web-based dashboard interface. On the left, there's a sidebar with navigation links: Home, Starred, Dashboards (which is selected), Playlists, Snapshots, Library panels, Public dashboards, Alerting, and Administration. The main content area has a header with filters: GISC (selected), All, centre_id, All, gc_report_id, and a search bar. A modal window is open over the dashboard, titled "Global Broker (Notification messages)" with a "GC for GISCs" section. It lists several options: cn-cma-global-cache, data-metoffice-noaa-global-cache, de-dwd-global-cache (which is highlighted in yellow), jp-jma-global-cache, kr-kma-global-cache, and sa-ncm-global-cache. Below the modal, there are two circular gauge charts: "WIS2 Nodes Total Downloaded" with a value of 68 (circled in yellow) and "WIS2 Nodes Download Error" with a value of 7. To the right of the gauges is a table titled "WIS2 Nodes Total Downloaded" with columns for centre_id and Download Total. Another table titled "WIS2 Nodes Download Error" with columns for centre_id and Errors is also visible.

centre_id	Download Total
ca-eccc-msc	624022
de-dwd-gts-to-wis2	484402
jp-jma-gts-to-wis2	234027
us-noaa-nws	100829
us-noaa-synoptic	28963

us-cimss	17
us-noaa-nws	4
int-eumetsat	3

Select GC and read value

Check has to be performed at roster start and roster end. Additional dates can also be added.

Chapter 4. PART III. Procedures for Issues Management

The WIS2 ticketing system is provided and operated by WMO : <https://jira.wmo.int>.

Chapter 5. Tickets review guideline

The GISC in charge needs to review the tickets with the following guidelines:

(1) Review frequency

- At least once or twice a week.

(2) Key focus

- Focus on “stalled” ticket”: send reminder for tickets inactive for more than 2 weeks

(3) Automatic ticket creation

- Most tickets are expected to be created automatically by the GISC Monitoring system

Chapter 6. Procedure to review Jira Tickets for the GISC Watch:

(1) Access the JIRA system:

- Access portal: <https://jira.wmo.int>
- Guide to how to login JIRA and reset password as an external user: https://wmoomm.sharepoint.com/:b/s/wmocpdbl/EdDUVYxOoRhIsAMp5yBmFicBz24ARqhDs_YEpidVd5oQ7g?e=7e2CmO
- JIRA accounts: There are two types of JIRA accounts:
 - WIS2-IMS-Operator, one account per GISC, associated with a general email address.
 - WIS2-IMS-Experts, one or more accounts per GISC. This group is intended for technical experts involved for resolving the tickets.

If there are any changes or updates to the JIRA accounts for your GISC, please inform the WMO Secretariat so that the necessary updates can be made to ensure continued access.

(2) Select the correct project

- Choose Project "WIS2 IMS"

The figure consists of four screenshots illustrating the steps to select the 'WIS2 IMS' project in Jira:

- Step 1:** Shows the browser address bar with the URL <https://jira.wmo.int> highlighted by a yellow box.
- Step 2:** Shows the Jira login screen with the 'john.doe@xpto.sky' email field highlighted by a yellow box.
- Step 3:** Shows the Jira System Dashboard with the 'Projects' menu item circled in red and highlighted by a yellow box.
- Step 4:** Shows the Jira project selection screen with the 'WIS2 IMS (WI)' project circled in red and highlighted by a yellow box.

(3) Filter tickets

- "Issues" → "View all issues and tickets" (upper right) → Filter "Status" by unchoosing "Done"

Workflow of the tickets can be found here: <https://wmoomm.sharepoint.com/:w/s/wmocpdbl/EXmYNLQKs59AlHToO9rH6YAB3xoVjdqeoD2fkC-4h4aPjA?e=XqmxpR>

(4) Ticket Handling

- Review ticket list and send reminders (inside tickets) for tickets inactive for more than 2 weeks.
- Assign tickets to relevant Assignees for the tickets with status “TRIAGE” (new tickets)

The image displays three overlapping screenshots of the Jira software interface:

- Screenshot 5 (Left):** Shows the "Activity" view with a list of recent events. A red circle highlights the "Switch view" button, and a yellow box labeled "5" is overlaid on the top right corner.
- Screenshot 6 (Middle):** Shows the "Activity" view with a list of recent events. A red circle highlights the "Statistics" link, and a yellow box labeled "6" is overlaid on the top right corner.
- Screenshot 7 (Right):** Shows the "Statistics" view. A red circle highlights the "Status Summary" section, and a yellow box labeled "7" is overlaid on the top right corner. The "Status Summary" table shows the following data:

Status	Issues	Percentage
In Progress	5	10%
To Do	14	27%
Done	32	62%
In Review	1	2%

Table-1: Priority Levels

6.1. Incident Impact Levels and GISC Response Times

Level	Impact	Examples	Assigned GISC: Time to Respond	Assigned GISC: Time to Resolve
Very High	- Severe impact on one or more GISC operations - Immediate action required	- Total failure of Global Services	ASAP / within 1 day	ASAP / within 1 week
High	- One or more essential services are unavailable - Action required within one week	- Global Services are offline	Within 1 week	Within 1 month
Medium	- Essential services not affected - Response required, monitoring ongoing	- Partial outage of a Global Service - Missing data from multiple WIS2Nodes simultaneously	Within 1 week	Monthly progress updates
Low	Not to be used	—	—	—
None	Not to be used	—	—	—

Chapter 7. PART IV. Procedures for Handover

7.1. (a) Handover Process

1. The GISC currently on duty is responsible for sending the handover report to the next GISC in the roster.
2. If no confirmation is received:
 - The current GISC must follow up with a reminder.
 - GISC Watch duties must be maintained until the next GISC acknowledges receipt of the handover.
3. If there is still no response:
 - The GISC following the next one in the roster should be contacted to agree on a revised handover date.
 - The purpose is to ensure continuity by splitting the remaining period between the two GISCs if needed.

7.2. (b) Summary Handover Report

1. The handover report **formally transfers GISC Watch responsibilities** to the next GISC.
2. The report must be sent as follows:
 - **To:** the next GISC in the roster
 - **CC:** gisc-ops@groups.wmo.int, wis@wmo.int
3. The GISC Watch report 2026 to be completed is available [here](#)
 - **Note1:** The GISC Watch report is a consolidated report. Outgoing GISCs are responsible for adding the columns corresponding to the GISC Watch period.
 - **Note2:** Only the email addresses of the GISCs included in the mailing list gisc-ops@groups.wmo.int, which serves as the official channel for GISC Watch handover and takeover communications, have the access to edit this document as per the decisions at the [ET-WISOP 10th meeting](#).
 - **Note3:** For any changes of the email addresses, please contact the WMO Secretariat at wis@wmo.int.
4. A sample Handover email

Chapter 8. GISC WATCH REPORT EXAMPLE

From: GISC Toulouse
To: GISC Beijing
Cc: gisc-ops@groups.wmo.int, wis@wmo.int
Subject: GISC WATCH REPORT – 01–15 April 2025

GISC Toulouse has completed the GISC Watch duty for the period *1–15 April 2025*. Please find below the summary report for this period:

1. General Information

- WIS2 to GTS gateway test conducted on *9 April 2025*

2. Global Services Status

- [Provide a summary of the operational status, issues encountered, or actions taken during the watch period]

3. JIRA tickets activity:

- Several ticket assignations from □TRIAGE□ performed
- Duplicate tickets closed
- Several stalled tickets reminders send

GISC Beijing: Would you please confirm the GISC Watch handover?

Best regards,

GISC Toulouse

Chapter 9. PART V. Procedure for Escalation

For any issue related to GISC Watch that requires escalation, the Chair of ET-WISOP is the first escalation point for all GISCs

Appendix 1: IMS-GISC Operator Manual

Chapter 10. 1. How to Login as External User

10.1. Step 1:

Access the login URL: <https://jira.wmo.int/secure/Dashboard.jspa>

The screenshot shows the Jira System Dashboard. The top navigation bar includes the WMO logo, a 'Dashboards' dropdown, a search bar, and a 'Log In' button. The main area is titled 'System Dashboard'. On the left, the 'Introduction' panel features a blue background with two stylized figures and the text 'Welcome to Jira' and 'New to Jira? Check out the [Jira User's Guide](#)'. On the right, the 'Login' panel has tabs for 'WMO Staff' and 'External Users', with the 'External Users' tab being the active one. At the bottom, there are links for 'Atlassian Jira Project Management Software', 'About Jira', and 'Report a problem', followed by a note about the free Atlassian Jira community license for WMO alert hub team.

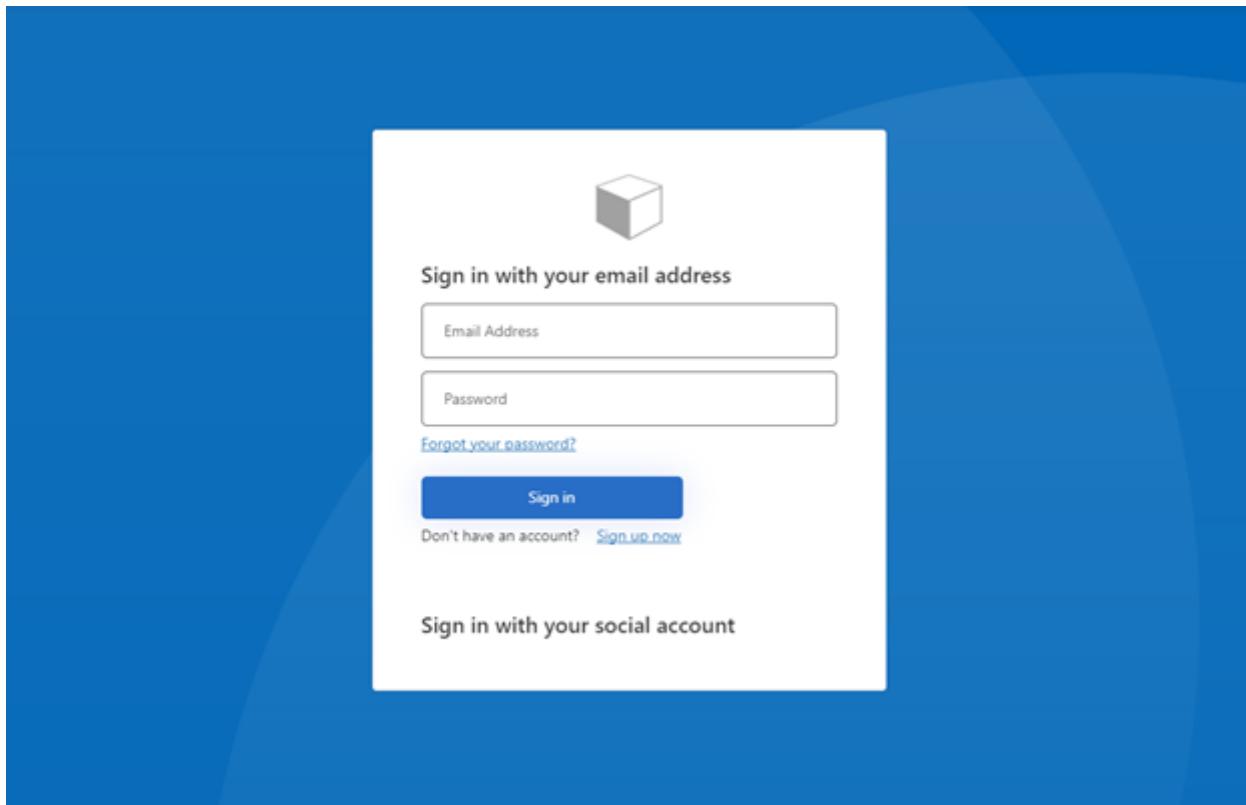

10.2. Step 2:

Click on the **External Users** button.

This screenshot is identical to the one above, showing the Jira System Dashboard. However, the 'External Users' button in the 'Login' panel is now highlighted with a red circle. A tooltip below the button reads 'Click to login with External Users'.

10.3. Step 3:

You will be redirected to the login page. Enter your email and password as registered in our database.

Chapter 11. 2. How to Resolve an Issue

- **Note1** The GISC Watch on-duty may close tickets if the comments clearly indicate that the issue has been resolved. If the comments are unclear, lack evidence, or show no progress, the GISC Watch on-duty is responsible for following up with the assignee to verify the ticket's status.
- **Note2** The ticket reporter may close tickets once the issue has been resolved.
- **Note3** The assignee may close tickets once the issue has been resolved.
- **Note4** The WMO Secretariat may close the tickets if the comments clearly indicate the issue has been resolved.

11.1. Step 1:

After logging in, you may find the issues assigned to you.

The screenshot shows the Jira System Dashboard. On the left, there is an 'Introduction' section with a welcome message and a 'Welcome to Jira' icon. On the right, there are two main panels: 'Assigned to Me' and 'WMO-Jira'.
Assigned to Me: This panel lists one issue: WI-39, titled 'No cache has received any data from WIS2 Node (hk-hko-swic)'. It includes a summary, a 'P' button, and a note that it is '1-1 of 1'.
WMO-Jira: This panel displays a news feed with several entries:

- Mr HAN, Xinqiang changed the Assignee to 'Mr HAN, Xinqiang' on WI-40 - Download Failures from WIS2 Node (hk-hko-swic). (17 minutes ago)
- Mr HAN, Xinqiang changed the status to Done on WI-40 - Download Failures from WIS2 Node (hk-hko-swic). (1 hour ago)
- Mr HAN, Xinqiang changed the Assignee to 'Ms Lei XUE' on WI-41 - Metadata for fr-meteofrance in GB China. (1 hour ago)
- Mr HAN, Xinqiang started progress on WI-41 - Metadata for fr-meteofrance in GB China. (1 hour ago)
- Ms Lei XUE started progress on WI-40 - Download Failures from WIS2 Node (hk-hko-swic). (1 hour ago)

You can also find your issues by navigating to: [User Profile → Boards → Only My Issues](#)

The screenshot shows a Jira Kanban board titled "GSC-Exter". The board has three columns: "TO DO 1 OF 18", "IN PROGRESS 0", and "DONE 0 OF 0". A single issue, WI-39, is present in the "TO DO" column. The issue details are: "No cache has received any data from WIS2 Node (hk-hko-swic)". The sidebar on the right includes a "Boards" option, which is circled in red.

Alternatively, click on **Issues** in the top menu and select **My Open Issues** from the left panel.

The screenshot shows the Jira search interface. The sidebar on the left has a "Find filters" section with various options like "My open issues", "Reported by me", "All issues" (which is circled in red), "Open issues", "Done issues", "Viewed recently", "Created recently", "Resolved recently", and "Updated recently". The main search results show an issue titled "Download Failures from WIS2 Node (hk-hko-swic)". The issue details are: Type: Incident, Priority: High, Labels: Download, Failures, hk-hko-swic. The description states: "Since 16:30 UTC on March 18th, Download Failures from WIS2 Node (hk-hko-swic) .". The issue is assigned to Mr HAN, Xinqiang and reported by Ms GU, Wenjing. There are 17 of 42 issues listed.

11.2. Step 2:

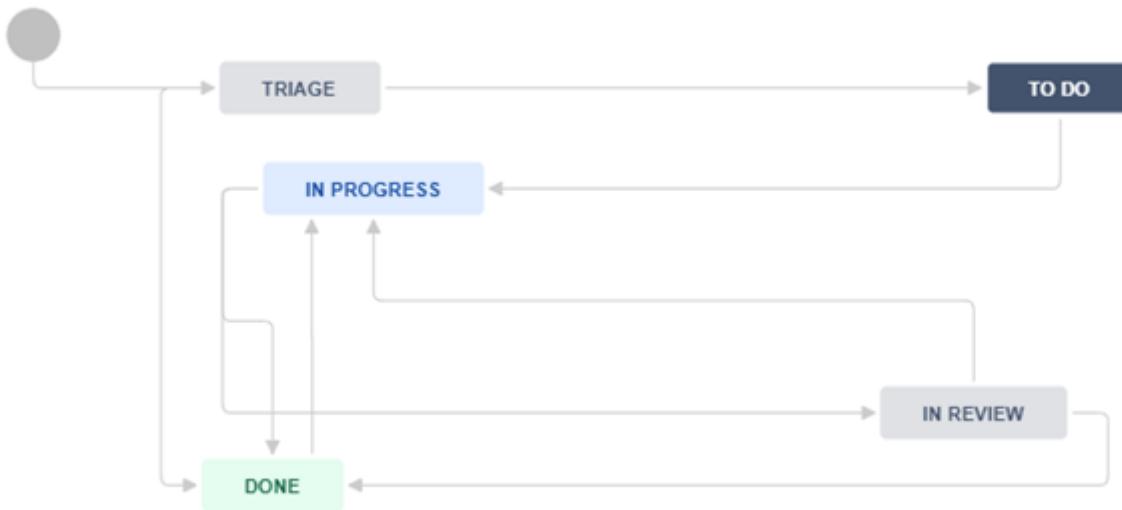

The GISC Operator should:

- Check the issue.
- Assign it to the responsible person (e.g., HAN Xinqiang).
- Set the issue status from **Triage** to **T0 DO**.

The screenshot shows a Jira issue page for WI-40 titled "Download Failures from WIS2 Node (hk-hko-swic)". The page includes sections for Details, Description, Attachments, Activity, and a large central area for Comments. A modal dialog box titled "Assign: WI-40" is open, prompting the user to assign the issue to "Mr HAN, Xinqiang". The dialog contains a comment field with the message "Please contact Hong Kong for investigation and treatment, thank you." and includes a rich text editor toolbar.

The screenshot shows a Jira issue page for WI-40 with the "Triage" option selected in the top navigation bar. The main content area displays the issue details, attachments, activity, and comments. A dropdown menu is open over the "View workflow" link in the Details section, showing options: "Assign ticket to user" (with a "SO SO" button), "Close issue" (with a "DONE" button), and "View workflow".

You can view the workflow by clicking on **View Workflow**.

11.3. Step 3:

The assignee (e.g., HAN Xinqiang) begins work on the issue and sets the status from **TO DO** to **IN PROGRESS**.

The screenshot shows a Jira issue page for 'Download Failures from WIS2 Node (hk-hko-swic)'. The top navigation bar includes 'Dashboards', 'Projects', 'Issues', 'Boards', and 'Create'. The main content area displays the issue details: Type: Incident, Priority: High, Labels: Download, Failures, hk-hko-swic. The 'Assignee' field is set to 'Mr HAN, Xinqiang'. The status is shown as 'IN PROGRESS' with a transition history: 'Assignee starts workin... → IN PROGRESS'. Below the status, there are sections for 'Description' (containing the note 'Since 16:30 UTC on March 18th, Download Failures from WIS2 Node (hk-hko-swic) .'), 'Attachments' (empty), and 'People' (listing assignee, reporter, voter, and watcher). The 'Dates' section shows 'Created: 6 minutes ago' and 'Updated: Just now'.

11.4. Step 4:

After addressing the issue, the assignee submits it for review: - Set the status from **IN PROGRESS** to **IN REVIEW**. - Assign the issue to the reviewer (e.g., XUE Lei).

The process history is visible in the comments below, along with Reporter, Assignee, Watchers, etc., on the right.

Chapter 12. 3. How to Create an Issue

12.1. Step 1:

In the user interface, click **Create**, describe the problem in detail using graphics and/or text, set the Priority, and assign the issue to the relevant GISC.

The screenshot shows the 'Edit Issue' dialog for ticket WI-46. The 'Summary' field contains the text 'GC (Saudi Arabia) is not reflected in GM (China)'. The 'Issue Type' is set to 'Incident'. The 'Description' field contains a detailed text block: 'The metrics of GC (Saudi Arabia) can be accessed by: [https://wis2.nmc.gov.sa/cache/metrics/globalcache/gc_metrics.txt]. Although the metrics appear to be collected incorrectly, they are currently not reflected in the GM (China). Could you please investigate this issue?'. The 'Priority' is set to 'Medium'. The 'Assignee' dropdown is set to 'GISC-BEIJING WIS2 IMS Experts'. The 'Comment' field is empty. The 'Update' and 'Cancel' buttons are at the bottom right.

12.2. Step 2:

Add a comment to further explain the issue.

Activity

Comment

From component wis2-gisc-GC, 5 out of 6 Global Caches are presented, missing GC (Saudi Arabia). In theory, GC (Saudi Arabia) should be in the drop-down list as well as the other 5 GCs.

12.3. Step 3:

Add a Due Date as needed

- **Note1** Reporter may add a Due Date when creating a ticket.
- **Note2** The GISC Watch on-duty may add a due date and update the ticket priority if none is set

or if the issues have been outstanding for some time.
